

IdeaMax Silent Install Procedure

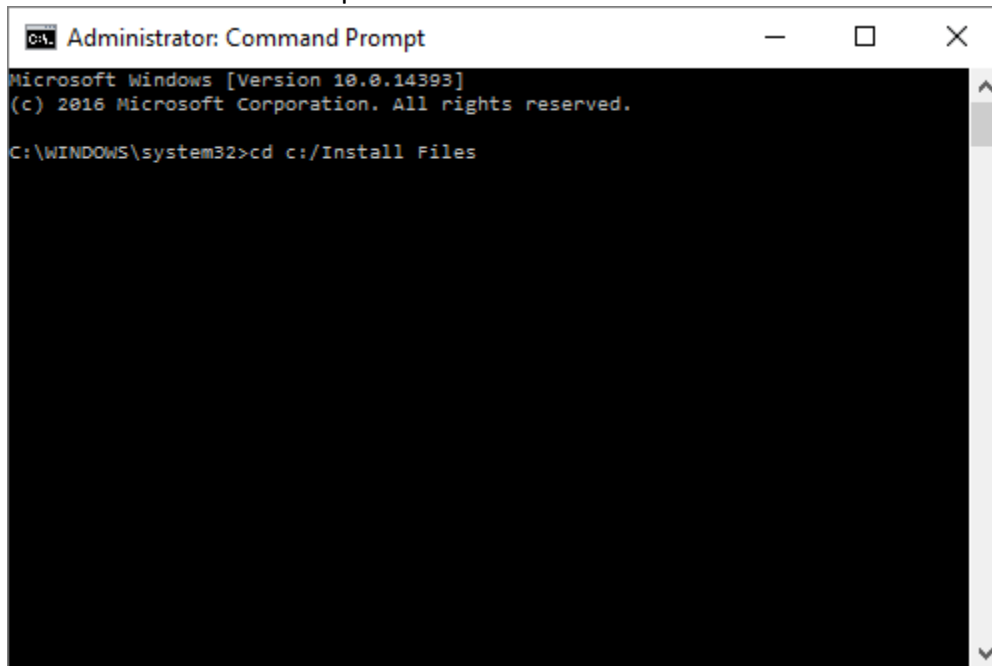

1. Extract the contents of the downloaded file and place them in a location of your choice. Navigate to the Application folder and find the Application.exe file.

2. The following .exe will be the file needed to run the software install silently.
Note: Be sure to note where the file is located as you will need this info to run the silent install in the CMD window.

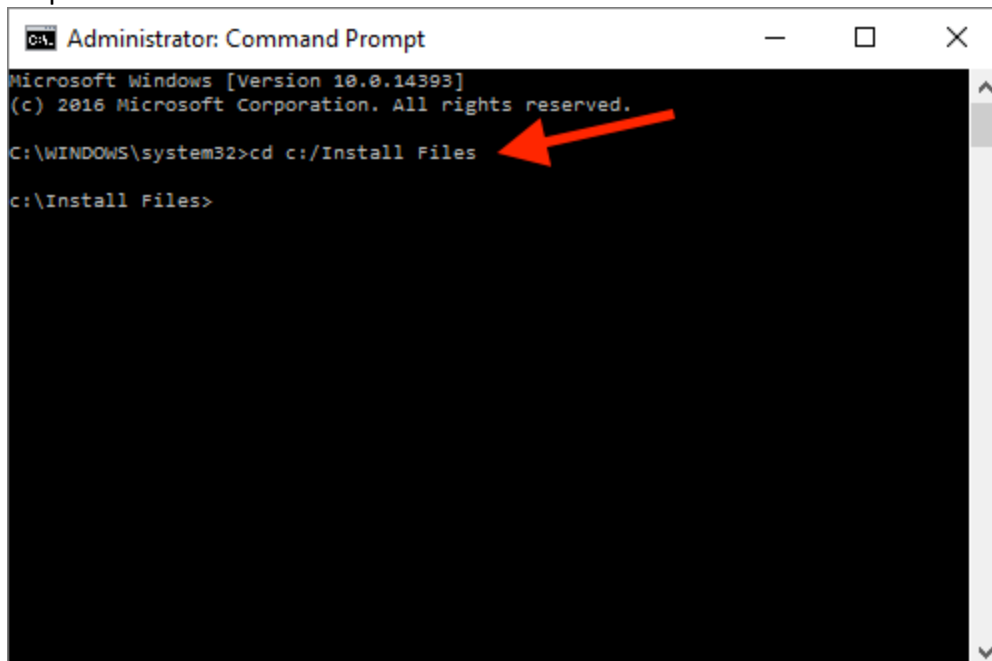

3. Launch a Command Prompt window in Administrator mode.

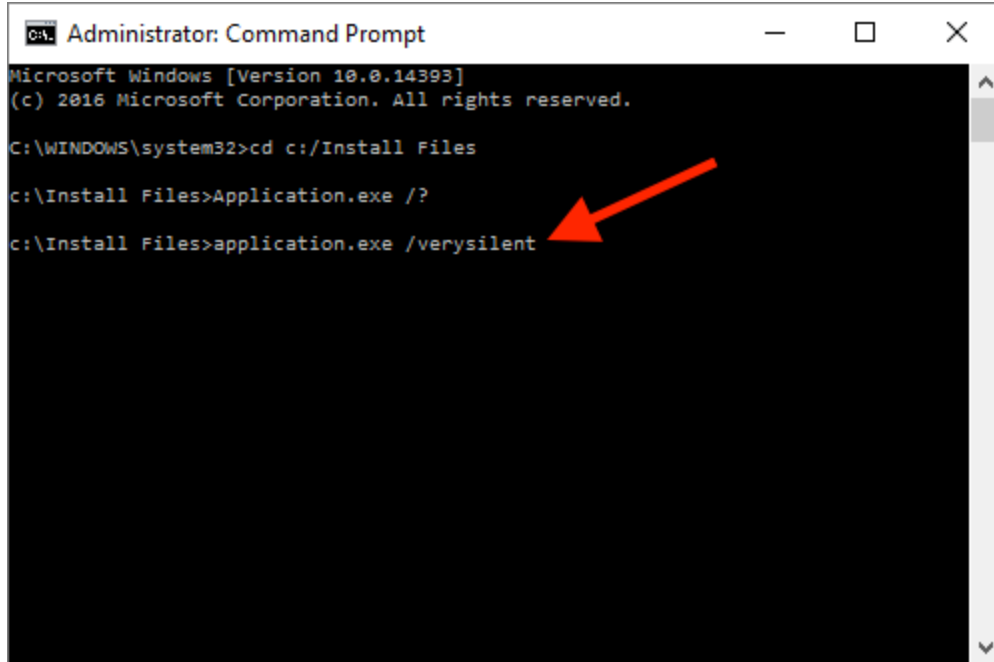

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.14393]
(c) 2016 Microsoft Corporation. All rights reserved.
C:\WINDOWS\system32>cd c:/Install Files
```

4. Perform a CD (Change Directory) to the location of the Application file you extracted in Step 2.

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.14393]
(c) 2016 Microsoft Corporation. All rights reserved.
C:\WINDOWS\system32>cd c:/Install Files
c:\Install Files>
```

5. Type the following command to install IdeaMax Silently “Application.exe /VerySilent”

The screenshot shows a Windows Command Prompt window titled "Administrator: Command Prompt". The window has a black background with white text. The text inside the window is as follows:

```
Microsoft Windows [Version 10.0.14393]
(c) 2016 Microsoft Corporation. All rights reserved.

C:\WINDOWS\system32>cd c:/Install Files
c:\Install Files>Application.exe /?
c:\Install Files>application.exe /verysilent
```

A red arrow points to the command `application.exe /verysilent` on the last line.

6. The software will now install and reboot automatically without requiring manual input.
Note: Please be sure the end-user has saved any important files before performing the silent install as the computer will reboot automatically once it has finished running.
