

Accessing File Commander

- Get to the Android Home Screen
- Tap the “Applications” icon on the toolbar.

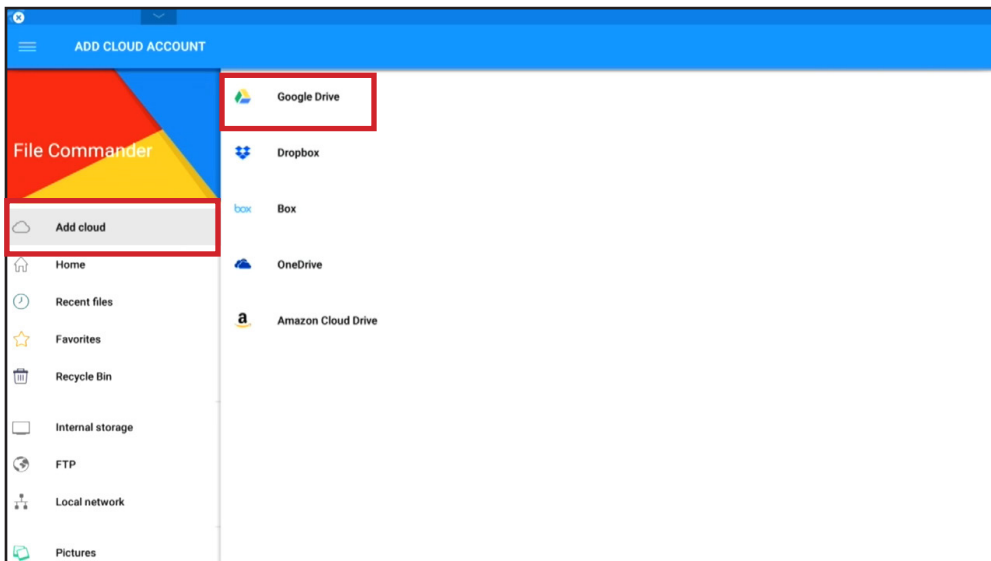

- Find and tap the “File Commander” icon
- File Commander will load on the screen.

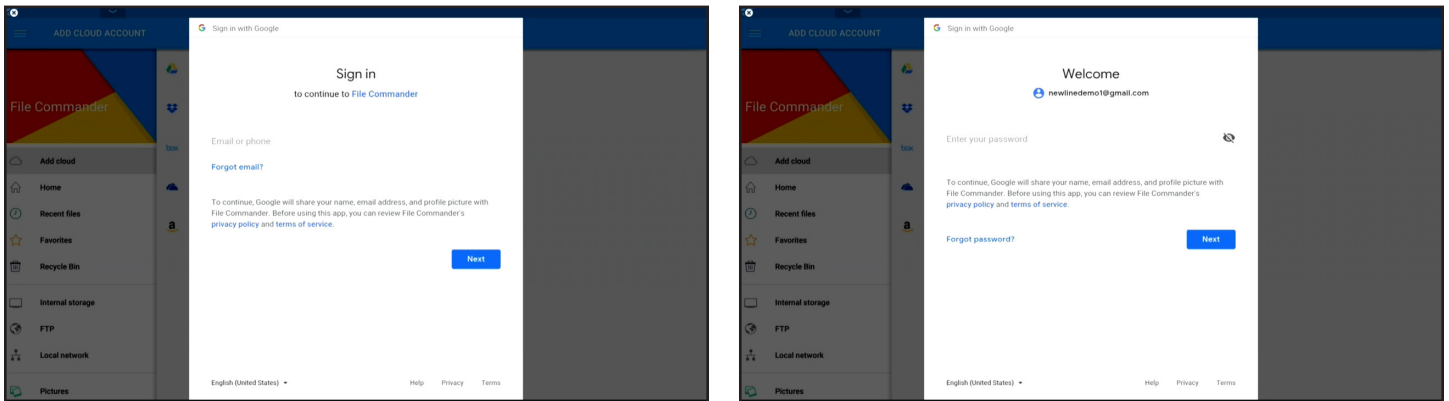

Connecting to Google Drive

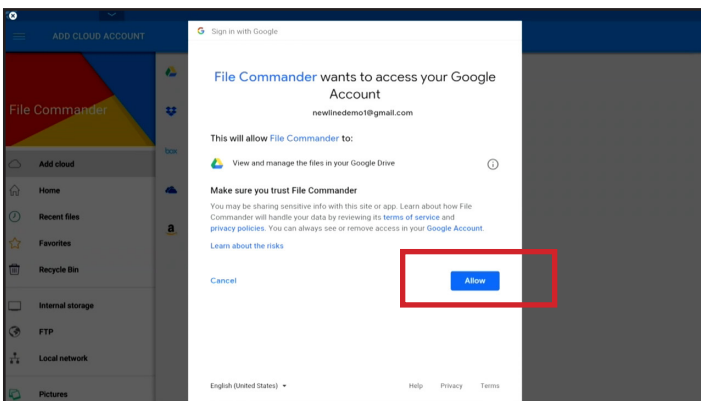

- Tap “Add Cloud” on the left hand menu.
- Select Google Drive from the available options.

- A pop up window will ask you to sign into your Google Drive account.

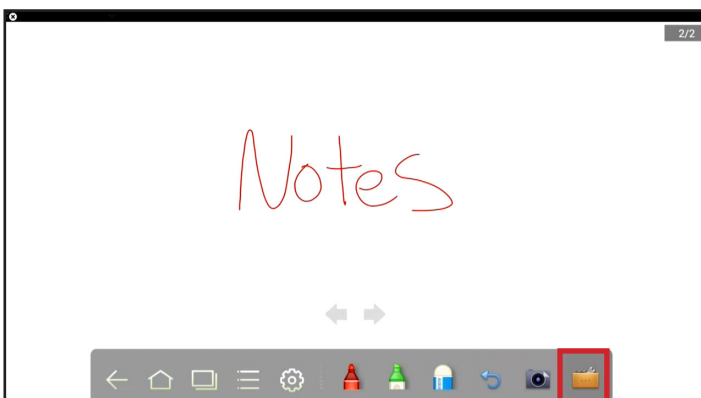

- File Commander will ask for access to view and manage files in your Drive account. Tap "Allow".

- Your Google Drive account is now connected to File Commander!

Sharing a Screenshot to Google Drive

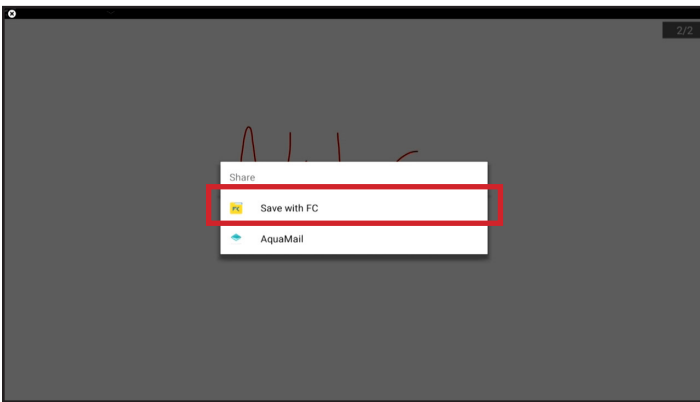

- Open the whiteboard app and take notes.
- When you're ready to take a snapshot of your screen, tap the "Tools" icon on the toolbar.

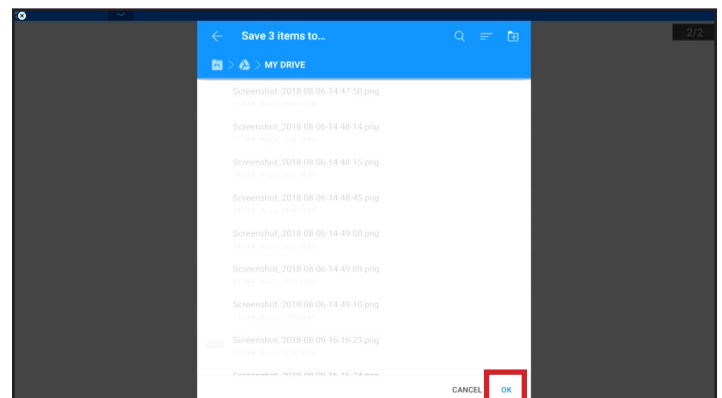

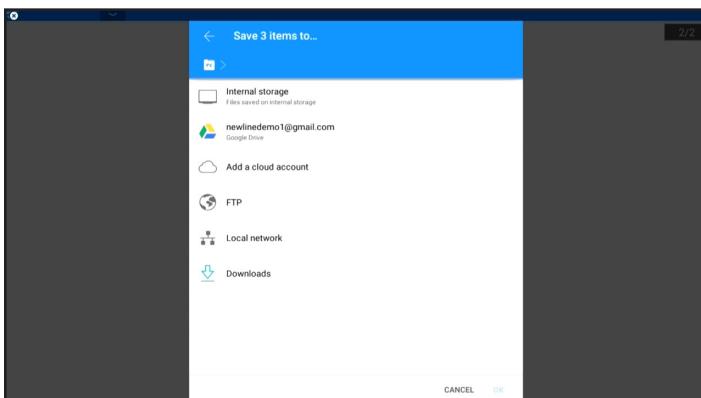

- A menu will pop up. Select "Share".

- A second menu will pop up. Select "Share with FC".

- A final window will pop up, letting you choose where in your Google Drive you would like to save the screenshot. Tap "OK" on the bottom right.

- The screenshot files will save directly to Google Drive.
